Georgia's State Chemist Praisos

Mr. J. H. McCandless, State Chemist of Georgia, before a recent gathering gave emphatic testimony to the high quality of Cottolene. He said:

"The sale of this product, and the proc-mation that it is made from cotton seed oil, have done more to bring cotton seed oil truthfully and favorably before the public than anything else in recent his-

Mr. McCandless then pointed out why a pure refined vegetable oil base, such as is used in Cottolene, is the only assurance a woman has of a clean, digestible cooking product.

Country Must Be Aroused. tion to these things, if only the country can be aroused to understand its immense potentialities. But how many people who read this know that it will be coasible to ship the oranges of southern California from Los Angeles to New York or Boston in fewer days by steamship through the Penama canal when completed, than by fast freight across he country?

"The distance from New York to Los Angeles by way of the Panama canal is, in round numbers, 5000 miles. A 6000 one capacity steamer oranges, or other fresh fruit, steaming at a rate of only 12 knots per hour, would cover this distance in 18 days. If we allow one day for the steamer passing through the caust, her total time No. 9 during the months of February from port to port would be 19 days. If the vessel were run specially for the day between San Antonio and El Paso. fruit trade, this time could be reduced by several days. A ship of 16 knots speed, such as those now used in the West India fruit trade, would make the trip in just 14 days, giving the allowance of one day for passing through

Steamers Quickest.

"The time for rail freights across the ontinent varies from 20 to 60 days. It will therefore be seen that the steame could. In all cases, land her freight in a shorter time. This means that many kinds of freight would be delivered in a better condition and for one-third the price now charged by the railroads.

Panama raffrond once built steamers, how many I do not recall, to run in connection with the road across the Isthmus of Panama. These steamers were to carry freight from New Orleans Colon. When they were started, raiload rates across the continent were cut down to such a figure that the steamers could not be operated. Merhants were short-sighted enough to accept the low rates and, as a result, the ships went to the scrap heap, or were sold for service in other waters. And the were before the steamship line was pro-jected." railroad rates went back to where they

Such is the name and occupation given by an American arrested in Juarez early Sunday morning, and now held on a charge of assault with intent to kill a Mexican police officer. Conviction means sentence of four years anyway. It is true that Deputy is a very strange name. But William is now sober,

and he says that it is his name, butletters found in his pockets are addressed to Mr. Deputy. Also he wore a star with "deputy sherlff" marked on it. He took trouble to display this star before he shot at the policeman, it is alleged. Now William Carvis Deputy, deputy says that he is employed as a deputy by the E. P. & S. W. railroad company.

The records of the Southwestern show that W. C. Deputy is a watchman at the shops of the company in East El Paso, and is a deputy sheriff just as he claims. Rumor had it that William was a Texas ranger, and he looks like one-top boots, big hat and all that. The letters he carried told something.
